Trident University offers stand-alone certificate programs for students seeking professional development without fully committing to a degree, or for those who already have advanced degrees and wish to take additional training to upgrade their working credentials. Whether seeking a promotion, in a career transition, or before committing toward a degree to obtain a certificate, Trident can help the prospective student achieve their educational goals. With a minimal investment and shorter duration to completion, students find the Trident certification option works best for their needs. Certificate programs consist of a series of four to six online college courses designed to provide students with the latest information and research available in their specific field of study/concentration.

Certificates do not qualify for Title IV federal financial aid and must be applied for separate from any degree program or concentration.

Please refer to Trident’s Policy regarding Dual Degrees/Concentrations/Certificates.

See reverse side for a list of certificate programs:
